How to install your invisibleSHIELD®

4

Sponge fingers to wet them
This helps avoid fingerprints on the invisibleSHIELD *

5

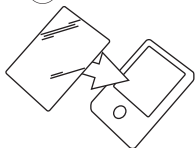

Remove invisibleSHIELD from backing

6

Sponge back side of SHIELD to wet enough to allow adjustments when placing shield

7

Align invisibleSHIELD to device

8

Wet front of invisibleSHIELD with sponge

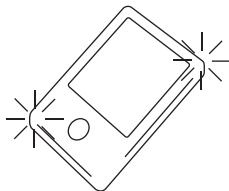

9

Squeegee out bubbles with the installation card

Let dry for

12 hrs to 24 hrs

[All remaining micro bubbles will dissipate with in the first 24 hours]

* If you do get fingerprints on the shield, they can be wiped off with the sponge
